NPB = Not a plan benefit.

* Base metal is the benefit. Noble metal, high noble metal, titanium alloy and titanium, if used, will be charged to the member at the additional lab cost of the noble metal, high noble metal, titanium alloy or titanium. Exception: Implants and all services associated with implants are listed at the actual member co-payment amount. No additional fee is allowable for noble metal, high noble metal, titanium alloy or titanium for implants and procedures associated with implants.

Resin, porcelain and any resin to metal or porcelain to metal crowns and pontics are a benefit on anterior (teeth numbers 6-11, 22-27), first bicuspid (teeth numbers 5, 12, 21, and 28) and second bicuspid (teeth numbers 4, 13, 20, and 29) teeth only. The member will be charged the additional lab cost to add resin or porcelain to all molar (teeth numbers 1-3, 14-19, 30-32) crowns and pontics. Exception: Implants and all services associated with implants are listed at the actual member co-payment amount. No additional fee is allowable for resin or porcelain for procedures associated with implants.

The maximum amount chargeable to the member to upgrade to resin or porcelain on molar teeth (teeth number 1-3, 14-19, 30-32) and/or upgrade to noble metal, high noble metal, titanium alloy or titanium is \$250.00

** Amalgam fillings are benefits on molar and bicuspid teeth (teeth numbers 1-5, 12-21, 28-32). If the member upgrades to a resin-based composite filling, they will pay the additional co-payment listed for these procedures (D2391-D2394).

*** Covered benefit only when in conjunction with covered oral surgery and pedodontic procedures when dispensed in a dental office by a practitioner acting within the scope of his/her licensure; and when warranted by documented conditions that local anesthetic is contraindicated. General anesthesia, as used for dental pain control, means the elimination of all sensations accompanied by a state of unconsciousness. Patient apprehension and/or nervousness are not of themselves sufficient justification for deep sedation/general anesthesia or intravenous conscious sedation/analgesia.

LIBERTY Dental Plan will arrange for you to receive services from a Contracted Dental Specialist if the necessary treatment is outside the scope of General Dentistry. Your General Dentist will initiate the referral process with LIBERTY Dental Plan. The proper referral process must be utilized for specialty services to be covered under your plan. X-rays for diagnostic purposes are benefits in the General Dentist's office only.

LIBERTY Dental Plan of California, Inc.
ORTHODONTIC RIDER O-400
Principal Benefits and Coverage

Primary Dentition:	Teeth developed and erupted first in order of time.
Transitional Dentition:	The final phase of the transition from primary to adult teeth, in which the deciduous molars and canines are in the process of shedding and the permanent successors are emerging.
Adolescent Dentition:	The dentition that is present after the normal loss of primary teeth and prior to cessation of growth that would affect orthodontic treatment.
Adult Dentition:	The dentition that is present after the cessation of growth that would affect orthodontic treatment.

Treatment must be provided by a LIBERTY Dental Plan contracted orthodontic provider.
Any procedure not listed is available at the provider's usual and customary fee.
