NJ FamilyCare Dental Services Clinical Criteria Policy

Introduction and Purpose:

The NJFC program has established a clinical criteria policy for dental services to establish a single set of clinical guidelines to be used by the State and the MCOs and their third party administrators and vendors in the processing of claims and the review of prior authorizations for treatment requests based on medical necessity or where applicable within the established frequencies.

The reviewing consultant should use these policies and their clinical judgement along with any submitted documentation and diagnostic materials when reviewing treatment requests for medical necessity. Consideration for prior authorization of services should consider the overall general health, patient compliance and dental history, condition of the oral cavity, long-term prognosis and complete treatment plan that is both judicious in the use of program funds and provides a clinically acceptable treatment outcome.

The MCO must monitor their consultants or those of the third party vendor each calendar year to ensure prior authorization decisions and claim payments are being made in accordance with the clinical criteria policy. The monitoring outcomes will be available to the State upon request.

Guidelines and Criteria for Complete Treatment Plan Submission:

Submission of a complete treatment plan is required where requests for complex cases with multiple root canals, crowns (single or abutment), partial denture(s) and/or multiple surgical periodontal procedures are being considered. A complete treatment plan may be required and the provider may be asked to sequentially submit several prior authorization requests, one for each of the various stages of the treatment. **Each prior authorization should be submitted as the provider is about to initiate that stage. This will ensure that the prior authorization will remain active during the stage of treatment.**

Acronyms used:

- AMN – As Medically Necessary
- BR – By Report
- CRA – Caries Risk Assessment
- CY – Calendar Year
- DMN – Documentation of Medical Necessity
- DOS – Date of Service
- ECC – Early Childhood Caries
- EPSDT – Early and Periodic Screening, Diagnostic and Treatment
- FX – Fracture
- LTCF – Long Term Care Facility
- HLD-(NJ Mod) New Jersey Orthodontic Assessment Tool for Comprehensive Treatment Index (most recent version)
- PA – Prior Authorization
- RCT – Root Canal Treatment
- RY – Rolling Year (1 year from the date of service)
- SHCN – Special Health Care Needs member

Format:

The document is in a grid format and follows the listing sequence by category of service as found in the American Dental Association CDT book and includes the following headers: CDT code, short description (nomenclature with abbreviations), age limits, frequency limits, documentation requirements and clinical criteria. A provider may refer to an individual servicing provider or provider group. For completed nomenclature and descriptor of a CDT code, please refer to the current CDT book published by the American Dental Association.

The policy will be updated annually based on CDT revisions and DMAHS decisions. (A complete list of codes and services included in the NJ FamilyCare program's benefit package may be found on the New Jersey Medicaid Management Information System website: https://www.njmmis.com/hospitalinfo.aspx.)

Early and Periodic Screening, Diagnostic and Treatment:

Please note that EPSDT guidelines for medically necessary services to children ages 0 through 20 supersede any restrictions included in the Clinical Criteria Grid, based on the following:

- Under Medicaid regulations a State must cover necessary health care, diagnostic services, treatment and other measures to correct or ameliorate defects and physical and mental illness and conditions.
- Services must be covered if they correct, compensate for, improve a condition, or prevent a condition from worsening-even if the condition cannot be prevented or cured. Based on this lifetime limits cannot be applied to limit the frequency for services provided to children under the age of 21. As a result the CC Grid cannot indicate once per lifetime and multiple requests for AMN services with supporting documentation cannot be denied.

Patient Records:

Dental diagnosis is to be documented for all treatment rendered on that DOS as per N.J.A.C. 10:56-1.9. This applies to units of behavior management which also requires medical diagnosis and clinical presentation be documented.

CDT (Current Dental Procedure Codes):

The current CDT Dental Procedure Codes from the American Dental Association (ADA) should be used as a reference for procedure code selection as the Clinical Criteria Grid is a quick reference guide for the NJ FamilyCare Program and uses abbreviations. The CDT provides the Nomenclature (written title of a procedure code) and Descriptor (narrative that further defines the nature of the intended use of a single code) and is updated annually by the ADA to provide additions, deletions and revisions.

Please note that many services such as complex oral and maxillofacial surgical procedures and maxillofacial prosthetics may be reimbursed by MCOs using the appropriate medical CPT codes. Either a CPT or a CDT code may be billed. Contact the MCO of enrollment for additional information.

Posting of the Clinical Criteria Grid:

The MCO shall post the Clinical Criteria Grid on their website and reference the location or provide a link in the provider manual. It shall be updated during the first quarter of the calendar year based on information provided by DMAHS.

NJ FamilyCare Dental Services Clinical Criteria Grid - 2022

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D0120	PERIODIC ORAL EVALUATION	none	Twice during a rolling year (RY) without PA per servicing provider/group and a maximum of four times during a rolling year for Special Health Care Needs (SHCN) or ECC Members which may require prior authorization. Not within 6 months of D0150 per servicing provider/group.	Medical diagnosis or clinical presentation required for increased frequency; all documentation to be included in dental records. The findings are discussed with the patient.	Subsequent oral evaluation for patient of record.
D0140	LIMIT ORAL EVAL PROBLM FOCUS	none	Twice in a RY, per servicing provider/group more require PA with documentation of medical necessity (DMN).	Documentation of medical necessity (DMN) to be included in dental records.	For use in emergent/urgent situations.
D0145	ORAL EVALUATION PATIENT < 3yrs	Under 3 years of age	Twice during a rolling year (RY) without PA and a maximum of four times during a rolling year per servicing provider/group for Special Health Care Needs (SHCN) or ECC Members which may require prior authorization.	Medical diagnosis or clinical presentation required for increased frequency; all documentation to be included in dental records.	Oral evaluation and continual counselling of primary caregiver.

NJ FamilyCare Dental Services Clinical Criteria Grid - 2022

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D0150	COMPREHENSIVE ORAL EVALUATION	Age 3 and older	Once every three years per servicing provider/group unless medical necessity can be documented for additional service.	Medical diagnosis or clinical presentation required for increased frequency.	For new patient or 3 years post previous comprehensive oral evaluation by same provider.
D0160	EXTENSV ORAL EVAL PROB FOCUS	none	Twice per RY per servicing provider/group.	DMN; to develop a treatment plan for a specific problem; only radiographs and/or other non-evaluation diagnostic codes provided on same date of service (DOS).	DMN; May be used by general dentists for second opinion for same complaint, condition or diagnosis.
D0170	RE-EVAL,EST PT, PROBLEM FOCUS	none	Twice per RY	DMN; only additional services allowed on same DOS are radiographs (D0220, D0240, D0270, D0277 and D0330).	For follow-up of recent prior visit for same complaint, condition or diagnosis.
D0171	RE-EVAL POST-OP VISIT	none	May be considered up to twice a RY per servicing provider/group; additional units require prior authorization.	DMN; only additional services allowed on same DOS are radiographs (D0220, D0270, D0277 and D0330).	For follow-up of recent prior oral surgical or periodontal surgery visit.
D0180	COMP PERIODONTAL EVALUATION	none	Once every three years unless medical necessity can be documented for more frequent service.	Recent full mouth perio charting and radiographs as needed for diagnosis; evaluation for oral cancer; narrative and photos if bone loss not visible on x-rays.	Evidence of periodontal disease.
D0190	SCREENING OF A PATIENT	Under 19 years of age	Allowed once per RY to same member	Service must be provided in non-office setting.	No other services on same DOS.

NJ FamilyCare Dental Services Clinical Criteria Grid - 2022

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D0210	INTRAORAL COMPLETE FILM SERIES	none	Complete series D0210 allowed once every three years per servicing provider/group unless medical necessity can be documented for additional service.	DMN; for additional service-documentation of extreme change in medical or dental condition.	Radiographic evaluation for diagnosis.
D0220	INTRAORAL PERIAPICAL FIRST	none	AMN for diagnosis	Provider is to indicate diagnosis in dental records. Periapical films (D0220, D0230) and bitewings (D0270, D0272) may be taken as needed for diagnosing a condition.	For diagnosing.
D0230	INTRAORAL PERIAPICAL EACH ADDITIONAL	none	AMN for diagnosis	Provider is to indicate diagnosis in dental records. Periapical films (D0220, D0230) and bitewings (D0270, D0272) may be taken as needed for diagnosing a condition.	For diagnosing.
D0240	INTRAORAL OCCLUSAL FILM	none	2 per RY	DMN in dental records; image covers a larger area than a periapical view; based on image, not size of film.	For diagnosing. Differential diagnosis supports image.
D0250	EXTRA ORAL 2D PROJECT IMAGE	none	2 per RY	Provider is to indicate diagnosis in dental records. Periapical films (D0220, D0230) and bitewings (D0270, D0272) may be taken as needed for diagnosing a condition; one per DOS.	For diagnosing.
D0251	EXTRA ORAL POSTERIOR IMAGE	none	AMN for diagnosis	Provider is to indicate diagnosis in dental records. Periapical films (D0220, D0230) and bitewings (D0270, D0272) may be taken as needed for diagnosing a condition.	For diagnosing. For complete view of posterior teeth, both arches.
D0270	DENTAL BITEWING SINGLE IMAGE	none	AMN for diagnosis	Provider is to indicate diagnosis in dental records. Periapical films (D0220, D0230) and bitewings (D0270,	For diagnosing.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
				D0272) may be taken as needed for diagnosing a condition.	
D0272	DENTAL BITEWINGS TWO IMAGES	none	1 per RY, then AMN for diagnosis	When same DOS as D0330, consider as full mouth series.	For diagnosing.
D0273	BITEWINGS - THREE IMAGES	none	1 per RY, then AMN for diagnosis	When same DOS as D0330, consider as full mouth series.	For diagnosing.
D0274	BITEWINGS FOUR IMAGES	none	1 per RY, then AMN for diagnosis	When same DOS as D0330, consider as full mouth series.	For diagnosing.
D0277	VERT BITEWINGS 7 TO 8 IMAGES	Age 21 and older	1 per RY, then AMN for diagnosis	When same DOS as D0330, consider as full mouth series; may be taken as needed for diagnosing condition.	For diagnosing.
D0310	DENTAL SIALOGRAPHY	none	AMN	Surgical narrative or dental records.	Salivary gland pathology diagnosis and treatment.
D0320	DENTAL TMJ ARTHROGRAM INCL INJECTION	none	AMN	Surgical narrative or dental records.	TMJD diagnosis and treatment.
D0321	OTHER TMJ IMAGES BY REPORT	none	AMN	DMN	TMJD diagnosis and treatment.
D0322	DENTAL TOMOGRAPHIC SURVEY	none	AMN-PA required	DMN; surgical narrative or dental records	Must demonstrate that tomographic survey improves treatment decisions and outcome/prognosis.
D0330	PANORAMIC IMAGE	none	D0330 allowed once every three years per servicing provider/group unless medical necessity can be documented for additional service. Is equivalent to full mouth series with 2, 3 or 4 BWs on same DOS.	Medical diagnosis, clinical presentation, orthodontic narrative. Additional service as needed to diagnose extensive oral surgery; interceptive or comprehensive orthodontic treatment; extreme change in medical or dental condition.	Diagnosis and treatment
D0340	2D CEPHALOMETRIC IMAGE	none	1 per RY per servicing provider/group.	DMN for use by OMFS; Orthodontists may take D0330 and D0340 as needed for diagnosing and must document rationale for this in dental records.	DMN for use by OMFS; case evaluation for interceptive or comprehensive orthodontics.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D0350	ORAL/FACIAL PHOTO IMAGES	none	Maximum 4 per RY	Documentation of medical necessity when radiographs cannot be provided for SHCN members or LTCF residents; orthodontic treatment included with orthodontic case rate.	Diagnosis and treatment
D0351	3D PHOTOGRAPHIC IMAGE	none	1 per RY per provider/group per DOS	DMN; differential diagnosis, medical and dental history associated with treatment request	For OMFS diagnosis.
D0364	CONE BEAM CT CAPTURE & INTERPRETATION LIMITED VIEW	none	AMN-PA required	PA to DMN with periapical view, narrative and service to be provided; for use in diagnosis and treatment planning based on medical necessity for complex cases: implant placement, complex endodontic procedures, assessment of cracked teeth when subgingival or furcational, large bony lesions, complex impactions, TMJ treatment where indicated.	Must demonstrate that CBCT improves treatment decisions and outcome/prognosis.
D0365	CONE BEAM CT INTERPRETATION MANDIBLE	none	AMN-PA required	PA to DMN with periapical view, narrative and service to be provided; for use in diagnosis and treatment planning based on medical necessity for complex cases: implant placement, complex endodontic procedures, large bony lesions, complex impactions, TMJ treatment where indicated.	Must demonstrate that CBCT improves treatment decisions and outcome/prognosis.
D0366	CONE BEAM CT INTERPRETATION MAXILLA	none	AMN-PA required	PA to DMN with periapical view, narrative and service to be provided; for use in diagnosis and treatment planning based on medical necessity for complex cases: implant	Must demonstrate that CBCT improves treatment decisions and outcome/prognosis.

D0502	OTHER ORAL PATHOLOGY PROCEDURE	none	DMN	BR	Diagnosis and treatment
D0601	CARIES RISK ASSESS LOW RISK	Under 21 years of age	Once per RY	CRA form in dental record; Service is provided on same date as oral evaluations (D0120, D0145, and D0150).	Diagnosis and treatment
D0602	CARIES RISK ASSESS MODERATE RISK	Under 21 years of age	Once per RY	CRA form in dental record; Service is provided on same date as oral evaluations (D0120, D0145, and D0150).	Diagnosis and treatment
D0603	CARIES RISK ASSESS HIGH RISK	Under 21 years of age	Once per RY	CRA form in dental record; Service is provided on same date as oral evaluations (D0120, D0145, and D0150).	Diagnosis and treatment
D0999	UNSPECIFIED DIAGNOSTIC PROCEDURE	none		BR. DMN; diagnosis, clinical presentation of provided service.	Service not described by CDT code
D1110	DENTAL PROPHYLAXIS ADULT	Age 16 and older	Allowed twice during a RY and a maximum of four times during a RY per servicing provider/group for SHCN Members which may require prior authorization.	DMN for increased frequency. Prophylaxes will not be reimbursed on same date of service (DOS) as D4346, D4341, D4342, D4355, D4910 or any periodontal surgical code.	Evidence of plaque, stains, calculus on tooth structure of permanent or transitional dentition.
D1120	DENTAL PROPHYLAXIS CHILD	Under age 16	Allowed twice during a RY and a maximum of four times during a RY per servicing provider/group for SHCN or ECC Members which may require	DMN for increased frequency. Prophylaxes will not be reimbursed on same date of service (DOS) as D4346, D4341, D4342, D4355, D4910 or any periodontal surgical code.	Evidence of plaque, stains, calculus on tooth structure of primary or transitional dentition.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
			prior authorization.		
D1206	TOPICAL FLUORIDE VARNISH	none	Can be provided to members twice in a RY per servicing provider/group under 21 with moderate to high risk on CRA; SHCN and ECC members up to four times annually with documentation of medical necessity; LTCF residents with high caries incidence and/or root caries.	Will not be reimbursed on same date of service (DOS) as D4346, D4341, D4342, D4355, D4910 or any periodontal surgical code. DMN for increased frequency.	Applied same day as D1110 or D1120; not same DOS as D1208.To prevent caries.
D1208	TOPICAL APPLICATION OF FLUORIDE EXCLUDING VARNISH	none	Can be provided to members of all ages (children and adults) twice in a RY per servicing provider/group; considered for SHCN and ECC members every 3 months with consideration based on documentation of medical necessity.	Will not be reimbursed on same date of service (DOS) as D4346, D4341, D4342, D4355, D4910 or any periodontal surgical code. DMN for increased frequency.	Applied same day as D1110 or D1120; not same DOS as D1206. To prevent caries.
D1351	DENTAL SEALANT PER TOOTH	Under age 17	May be provided every 3 years for children through the age of 16. Age restriction does not apply to SHCN.	Diagnostic periapical or bitewing; provide documentation of medical necessity. Moderate to high CRA score; previous history of restorations and/or caries.	D1353 and D1351 are allowed on unrestored surfaces of permanent molars and bicuspids. Deep fissures and grooves with no evidence of caries.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D1352	PREVENTIVE RESIN REST, PERMENENT TOOTH	none	Once per tooth	Diagnostic periapical or bitewing; caries risk assessment.	Moderate to high caries risk; active cavitated pit or fissure lesion not extended into dentin; includes sealant on same tooth.
D1353	SEALANT REPAIR PER TOOTH	Under age 17	May be provided every 3 years for children through the age of 16. Age restriction does not apply to SHCN.	Diagnostic periapical or bitewing; provide documentation of medical necessity.	D1353 and D1351 are allowed on unrestored surfaces of permanent molars and bicuspids. For damaged sealant in the absence of caries Includes primary molars.
D1354	APPLICATION OF CARIES MED APPLICATION -PER TOOTH	none	Twice per RY without PA	Medical history, clinical presentation	Primary and permanent teeth; ECC/rampant decay, SHCN members, root caries, LTCF residents.
D1510	SPACE MAINTAINER-FIXED-UNILATERAL PER QUADRANT	Under age 15	Once per quadrant without PA	Diagnostic periapicals or bitewings.	For premature loss of primary tooth; permanent tooth not ready to erupt; congenitally missing teeth; to prevent tooth movement; includes adjustments.
D1516	SPACE MAINTAINER-FIXED BILATERAL, MAXILLARY	Under age 15	Once without PA	Diagnostic periapicals or bitewings	For premature loss of primary tooth; permanent tooth not ready to erupt; congenitally missing teeth; to prevent tooth movement; includes adjustments.
D1517	SPACE MAINTAINER-FIXED-BILATERAL, MANDIBULAR	Under age 15	Once without PA	Diagnostic periapicals or bitewings	For premature loss of primary tooth; permanent tooth not ready to erupt; congenitally missing teeth; to prevent tooth movement; includes adjustments.
D1526	SPACE MAINTAINER-REMOVABLE-BILATERAL, MAXILLARY	Under age 15	Once without PA	Diagnostic periapicals or bitewings	For premature loss of primary tooth; permanent tooth not ready to erupt; congenitally missing teeth; to prevent tooth movement; includes adjustments.
D1527	SPACE MAINTAINER-REMOVABLE-BILATERAL, MANDIBULAR	Under age 15	Once without PA	Diagnostic periapicals or bitewings	For premature loss of primary tooth; permanent tooth not ready to erupt; congenitally missing teeth; to prevent tooth movement; includes adjustments.

				surgical procedures will be allowed every 3 years.	
D4263	BONE REPLACE GRAFT FIRST SITE IN QUAD	Age 18 and older	Once per tooth (each tooth = 1 site)	Full mouth x-rays or photos and narrative if SHCN; perio charting; case type; oral hygiene status; occlusal trauma; mobility; at least four weeks after scaling, excepting SHCN OR cases. Not with implant cases; does not include entry and closure, wound debridement, osseous contouring, biologic materials or barrier membranes. Other procedures on same DOS documented by their own codes.	For regeneration of bone lost through periodontal disease to correct a deformity or defect; not for edentulous spaces or extraction sites. For retained natural tooth, presence of bone loss.
D4264	BONE REPLACE GRAFT EACH ADDITIONAL SITE IN A QUADRANT	Age 18 and older	Once per tooth	Full mouth x-rays or photos and narrative if SHCN; perio charting; case type; oral hygiene status; occlusal trauma; mobility; at least four weeks after scaling, excepting SHCN OR cases Not with implant cases. Performed with one or more bone replacement grafts; number of sites to be documented	For regeneration of bone lost through periodontal disease to correct a deformity or defect; not for edentulous spaces or extraction sites. For retained natural tooth, presence of bone loss.
D4265	BIOLOGIC MATERIALS TO AID SOFT TISSUE/ OSSEOUS REGENERATION, PER SITE	Age 18 and older	Once per site	Recent diagnostic images and periodontal charting. Used alone or with other regenerative materials such as bone and barrier membranes; does not include surgical entry and closure, debridement, osseous contouring or placement of graft related materials and or membranes. Other procedures provided on same DOS to be reported with own codes.	For the correction of periodontal defects involving restorable teeth in occlusion, presence of bone loss.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D4266	GUIDED TISSUE REGENERATION RESORBABLE	Age 18 and older	Once per tooth (each tooth = 1 site)	Recent diagnostic images and periodontal charting. Does not include surgical entry and closure, wound debridement, osseous contouring or placement of barrier membranes or graft materials; other procedures provided on same DOS reported using their own codes	For correction of periodontal and peri-implant defects involving restorable teeth or implant in occlusion presence of bone loss.
D4267	GUIDED TISSUE REGENERATION NONRESORBABLE	Age 18 and older	Once per tooth (each tooth = 1 site)	Full mouth x-rays or photos and narrative if SHCN; perio charting; case type; oral hygiene status; occlusal trauma; mobility; at least four weeks after scaling, excepting SHCN OR cases. Not with implant cases; does not include entry and closure, wound debridement, osseous contouring, biologic materials or barrier membranes. Other procedures on same DOS documented by their own codes.	For correction of periodontal and peri-implant defects involving restorable teeth or implant in occlusion presence of bone loss.
D4268	SURGICAL REVISION PROCEDURE, PER TOOTH	Age 18 and older	Once per tooth	Full mouth x-rays or photos and narrative if SHCN; perio charting; case type; oral hygiene status; occlusal trauma; mobility; at least four weeks after scaling, excepting SHCN OR cases. Not with implant cases; does not include entry and closure, wound debridement, osseous contouring, biologic materials or barrier membranes. Other procedures on same DOS documented by their own codes.	To refine results of previous surgical procedure; presence of bone loss, may modify irregular contours of soft or hard tissue; muccoperiosteal flap to access alveolar bone; flap(s) replaced or repositioned and sutured.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D4270	PEDICLE SOFT TISSUE GRAFT PROCEDURE	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	Adjacent gingiva is used to replace absent alveolar mucosa as marginal tissue; for root coverage or correct gingival defects on prominent teeth.
D4273	AUTO TISSUE GRAFT FIRST TOOTH	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	For correction of gingival defects of tooth, implant or dental ridge; utilizes donor site.
D4274	MESIAL/DISTAL WEDGE PROCEDURE	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	To reduce pocket depth in edentulous area adjacent to erupted tooth.
D4275	NON-AUTOGEOUS GRAFT FIRST TOOTH	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	For correction of gingival defects of tooth (including recession), implant or dental ridge; eliminate pull of frena and muscle attachments; no donor site.
D4276	CONNECTIVE TISSUE AND PEDICLE GRAFT	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	For advanced gingival recession, utilizes combined tissue grafting procedures.
D4277	SOFT TISSUE GRAFT FIRSTTOOTH	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	For correction of gingival defects of tooth, implant or dental ridge; utilizes donor site.
D4278	SOFT TISSUE GRAFT ADDITIONAL TOOTH	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	For correction of gingival defects of tooth, implant or dental ridge; utilizes donor site.
D4283	AUTO TISSUE GRAFT ADDITIONAL TOOTH	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	For correction of gingival defects of tooth, implant or dental ridge; utilizes donor site.
D4285	NON-AUTO GRAFT ADDITIONAL TOOTH	Age 18 and older	Once per tooth	Recent perio charting, diagnostic radiographs and/or photographs, narrative.	For correction of gingival defects of tooth (including recession), implant or dental ridge; eliminate pull of frena and muscle attachments; no donor site; same graft site, used in conjunction with D4275.
D4322	SPLINT – INTRA-CORONAL; NATURAL TEETH OR PROSTHETIC CROWNS	none	AMN	Full mouth x-rays or photos and narrative if SHCN; perio charting to include level of bone support, presence of occlusal trauma and/or mobility; treatment plan: per tooth	For interim stabilization of periodontally involved teeth; not for stabilization post-trauma (see D7270) presence of bone loss.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA

					treatment plan and sequence. Conforms to CDT descriptor.
D5999	UNSPECIFIED MAXILLOFACIAL PROSTHESIS	none		BR. DMN; diagnosis, clinical presentation of provided service;	Service not described by CDT code.
D6010	ENDOSTEAL IMPLANT	none	Maximum 4 per arch	Diagnostic radiographic images of implant sites as appropriate, number of and area where implants are to be placed, dental history to indicate date of denture fabrication, two years of difficulty with denture retention and provider's attempts to improve or correct retention of denture are required. Service is only considered with PA for denture(s) for edentulous arch(es) and complete implant treatment plan.	Patient is unable to function with conventional complete denture due to lack of retention due to insufficient bone.
D6011	SECOND STAGE IMPLANT SURGERY	none	Maximum 4 per arch	Recent diagnostic radiographic images of implants. Service is only considered with PA for denture(s) for edentulous arch(es).	Implant body(ies) require surgical exposure to continue case.
D6055	IMPLANT CONNECTING BAR	none	Once per arch	BR. To include diagnostic radiographs of implants showing successful osteointegration, Service is only considered with PA for denture(s) for edentulous arch(es) or narrative describing modification to functional preexisting dentures. Paid as case rate for entire arch.	Patient is unable to function with conventional complete denture due to lack of retention due to insufficient bone.
D6080	IMPLANT MAINTENANCE PROCEDURES	none	Twice per RY	BR; for debridement and evaluation of entire arch prostheses and its associated implants. Prosthesis is removed and reinserted.	Evidence of plaque, stains, calculus on implant structure. Ensure occlusion and stability of prosthesis.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D6081	SCALE & DEBRIDE, SINGLE IMPLANT	none	Once every 3 years	Recent images of implants, narrative to document inflammation; not on same DOS as D1110, D4910 or D4346 D6101, D6102, D6103.	For a single implant. Documentation of inflammation, medical history supports procedure.
D6090	REPAIR IMPLANT SUPPORTED PROSTHESIS	none	AMN There are no frequencies or time limits when DMN shows failure of material.	BR. Photograph, documentation of clinical findings and description of planned repair to include if it will be lab or in-office service. If required within a year of placement, these services will generally not be reimbursed to the same provider/group. They are replaced at provider's expense unless accidental trauma or damage by patient can be documented. Documentation that existing denture is serviceable and functional.	For repair of implant supported prosthesis.
D6091	REPLACEMENT OF REPLACEABLE PART OF SEMI-PRECISION R PRECISION ATTACHMENT OF IMPLANT/ ABUTMENT SUPPORTED PROSTHESIS, PER ATTACHMENT	none	AMN There are no frequencies or time limits when DMN shows failure of material.	Photograph, clinical findings and description of planned repair to include if it will be lab or in-office service If required within a year of placement, these services will generally not be reimbursed to the same provider/group. They are replaced at provider's expense unless accidental trauma or damage by patient can be documented.	Direct replacement of preexisting failed/defective semi-precision attachment.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
				Documentation that existing denture is serviceable and functional.	
D6092	RECEMENT ABUTMENT SUPPORTED CROWN	none	AMN There are no frequencies or time limits when DMN shows failure of material.	For single implant crowns. Recent, diagnostic radiograph or panoramic image.	Recementation of undamaged implant crown. Associated denture must be functional.
D6095	REPAIR IMPLANT ABUTMENT	none	AMN There are no frequencies or time limits when DMN shows failure of material.	BR. Photograph, narrative. Submit denture repair on same PA when applicable.	Repair of any part of implant abutment.
D6096	REMOVE BROKEN IMPLANT RETAIN SCREW	none	Once per implant	BR. To include diagnostic radiographs and narrative.	Failed implant screw.
D6100	SURGICAL REMOVAL OF IMPLANT BODY	none	Once per implant	To include diagnostic radiographs and narrative.	Implant failure
D6101	DEBRIDEMENT OF A PERIIMPLANT DEFECT	none	Once every 3 years; per implant	Diagnostic x-rays or photos and narrative to include oral hygiene status; occlusal trauma; mobility; Includes entry and closure. Not on same DOS as D6081.	For debridement and correction of peri-implant defect(s).
D6102	DEBRIDEMENT & CONTOURING OF A PERI-IMPLANT DEFECT	none	Once every 3 years; per implant	Diagnostic x-rays or photos and narrative to include oral hygiene status; occlusal trauma; mobility; Includes entry and closure. Not on same DOS as D6081.	For debridement and correction of peri-implant osseous defect(s).
D6103	BONE GRAFT REPAIR PERIMPLANT	none	Once every 3 years; per implant	Diagnostic x-rays or photos and narrative; to include oral hygiene status; occlusal trauma; mobility. Does not include entry and closure, wound debridement, osseous contouring, biologic materials or barrier membranes. Other procedures on same DOS documented by	For regeneration of bone loss associated with peri-implant osseous defect(s), to correct a deformity or defect.

				treatment of crowding are allowed and the dentist doing the exactions should retain the request for extractions or document this in the dental records.	
D7250	TOOTH ROOT REMOVAL	none	Once per tooth	Diagnostic radiographs	Includes cutting of soft tissue and bone, removal of tooth structure and closure. Conforms to CDT descriptor.
D7251	CORONECTOMY	none	Once per tooth	Diagnostic radiographs	Intentional partial removal of impacted tooth performed when neurovascular complication likely with complete removal. Conforms to CDT descriptor.
D7260	ORAL ANTRAL FISTULA CLOSURE	none	AMN	Diagnostic radiographs, dental records.	To provide primary closure between maxillary sinus and oral cavity. Conforms to CDT descriptor.
D7261	PRIMARY CLOSURE SINUS PERFORATION	none	AMN	Diagnostic radiographs, dental records; same DOS as surgery in upper posterior region	To repair sinus perforation. Conforms to CDT descriptor.
D7270	TOOTH REIMPLANTATION AND STABILIZATION	None	Once per tooth	Diagnostic radiographs, dental records; post dental/facial trauma includes splinting and/or stabilization not for periodontal splinting (see D4320, D4321: full mouth x-rays or photos and narrative if SHCN; perio charting to include presence of occlusal trauma and/or mobility, treatment plan (per tooth.).	Restorable tooth which had been in occlusion. Conforms to CDT descriptor.
D7280	EXPOSURE OF UNERUPTED TOOTH	Under age 21	Once per tooth	Diagnostic radiographs, dental records, narrative, treatment plan; approved PA for associated orthodontic service(s).	To aid in eruption of permanent teeth into functional position.
D7282	MOBILIZE ERUPTED/MALPOSITIONED TOOTH	Under age 21	Once per tooth	Diagnostic radiographs, dental records, narrative, treatment plan, approved PA for associated orthodontic services.	To aid in eruption of permanent tooth.

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
D7283	PLACE DEVICE FOR IMPACTED TOOTH ERRUPTION	Under age 21	Once per tooth	Diagnostic radiographs, dental records, narrative, treatment plan, approved PA for associated orthodontic services.	To aid in eruption of permanent tooth.
D7285	BIOPSY OF ORAL TISSUE HARD	none	No limits	Lab report, progress notes, area of mouth pathology report.	Per site Abnormal radiographic finding. Conforms to CDT descriptor.
D7286	BIOPSY OF ORAL TISSUE SOFT	none	No limits	Lab report, progress notes, area of mouth pathology report.	Abnormal appearance of soft tissue; for diagnosis and treatment. Conforms to CDT descriptor.
D7287	EXFOLIATIVE CYTOLOG COLLECTION	none	No limits	Lab report, progress notes, area of mouth pathology report.	Abnormal appearance of soft tissue; for diagnosis and treatment. Conforms to CDT descriptor.
D7288	BRUSH BIOPSY	none	No limits	Lab report, progress notes, area of mouth pathology report.	Abnormal appearance of soft tissue; for diagnosis and treatment. Conforms to CDT descriptor.
D7290	REPOSITIONING OF TEETH	Under age 21	Once per tooth	BR; Treatment plan, full mouth radiographs/panoramic image, narrative. Submitted on same PA with any associated grafting procedures.	Malposed tooth that is restorable has adequate bone support and is in occlusion; with ongoing orthodontic treatment or approved PA for orthodontic services. Conforms to CDT descriptor.
D7291	TRANSSEPTAL FIBEROTOMY	Under age 21	Once per area	BR; Treatment plan, recent diagnostic radiographs and photographs.	To facilitate tooth movement of permanent tooth; with ongoing orthodontic treatment or approved PA for orthodontic services. Conforms to CDT descriptor.
D7292	PLACEMENT OF TEMPORARY ANCHORAGE DEVICE [SCREW RETAINED PLATE] REQUIRING FLAP	Under age 21	Once per area	BR; Treatment plan, recent diagnostic radiographs and photographs.	To facilitate tooth movement of permanent tooth; with ongoing orthodontic treatment or approved PA for orthodontic services. Conforms to CDT descriptor
D7293	PLACEMENT OF TEMPORARY ANCHORAGE DEVICE REQUIRING FLAP	Under age 21	Once per area	BR; Treatment plan, recent diagnostic radiographs and photographs.	To facilitate tooth movement of permanent tooth; with ongoing orthodontic treatment or approved PA for orthodontic services. Conforms to CDT descriptor
D7294	PLACEMENT OF TEMPORARY ANCHORAGE	Under age 21	Once per area	BR; Treatment plan, recent diagnostic radiographs and photographs.	To facilitate tooth movement of permanent tooth; with ongoing orthodontic treatment or approved PA

CDT	SHORT - DESCRIPTION	AGE LIMITS	FREQUENCY LIMITS	DOCUMENTATION/ REQUIREMENTS	CLINICAL CRITERIA
	DEVICE WITHOUT FLAP				for orthodontic services. Conforms to CDT descriptor
D7298	REMOVAL OF TEMPORARY ANCHORAGE DEVICE [SCREW RETAINED PLATE, REQUIRING FLAP	Under age 21	Once per area	BR; Treatment plan, recent diagnostic radiographs and photographs. D7292 in history.	Based on completion of treatment or defective or damaged anchorage device.
D7299	REMOVAL OF TEMPORARY ANCHORAGE DEVICE, REQUIRING FLAP	Under age 21	Once per area	BR; Treatment plan, recent diagnostic radiographs and photographs. D7293 in history.	Based on completion of treatment or defective or damaged anchorage device.
D7300	REMOVAL OF TEMPORARY ANCHORAGE DEVICE, WITHOUT FLAP	Under age 21	Once per area	BR; Treatment plan, recent diagnostic radiographs and photographs. D7294 in history.	Based on completion of treatment or defective or damaged anchorage device.
D7295	BONE HARVEST, AUTO GRAFT PROCEDURE	none	AMN	BR; Treatment plan, full mouth radiographs/panoramic image, narrative. Include on same PA with other autogenous graft placement procedures which do not include harvesting of bone.	DMN Bone defect.
D7310	ALVEOPLASTY W/EXTRACTION 4 OR MORE TEETH	none	Once per quadrant	Treatment plan, full mouth radiographs/panoramic image, narrative; Four or more teeth per quadrant.	Preprosthetic surgery or before radiation therapy or transplant surgery. Recontouring of bone in area of extractions.
D7311	ALVEOLOPLASTY W/EXTRACT 1-3 TEETH	none	Once per quadrant	Treatment plan, full mouth radiographs/panoramic image, narrative; One to three teeth per quadrant.	Preprosthetic surgery or before radiation therapy or transplant surgery. Recontouring of bone in area of extractions.
D7320	ALVEOLOPLASTY W/O EXTRACTION 4 OR MORE TEETH	none	AMN	Treatment plan, full mouth radiographs/panoramic image, narrative; Four or more teeth per quadrant.	Pre prosthetic surgery or before radiation therapy or transplant surgery. Recontouring of bone i
D7321	ALVEOLOPLASTY NOT W/EXTRACTS 1-3 TEETH	none	AMN	Treatment plan, full mouth radiographs/panoramic image, narrative; One to three teeth per quadrant.	Preprosthetic surgery or before radiation therapy or transplant surgery. Recontouring of bone
